PROJECT TITLE

SENTIMENT ANALYSIS FOR  
MARKETING

PHASE 1

REG.NO : 712221104001

NAME: DHANUSH A

DEPT : COMPUTER SCIENCE AND ENGINEERING

YEAR & SEM : III & 05

COLLEGE : PARK COLLEGE OF ENGINEERING AND  
TECHNOLOGY

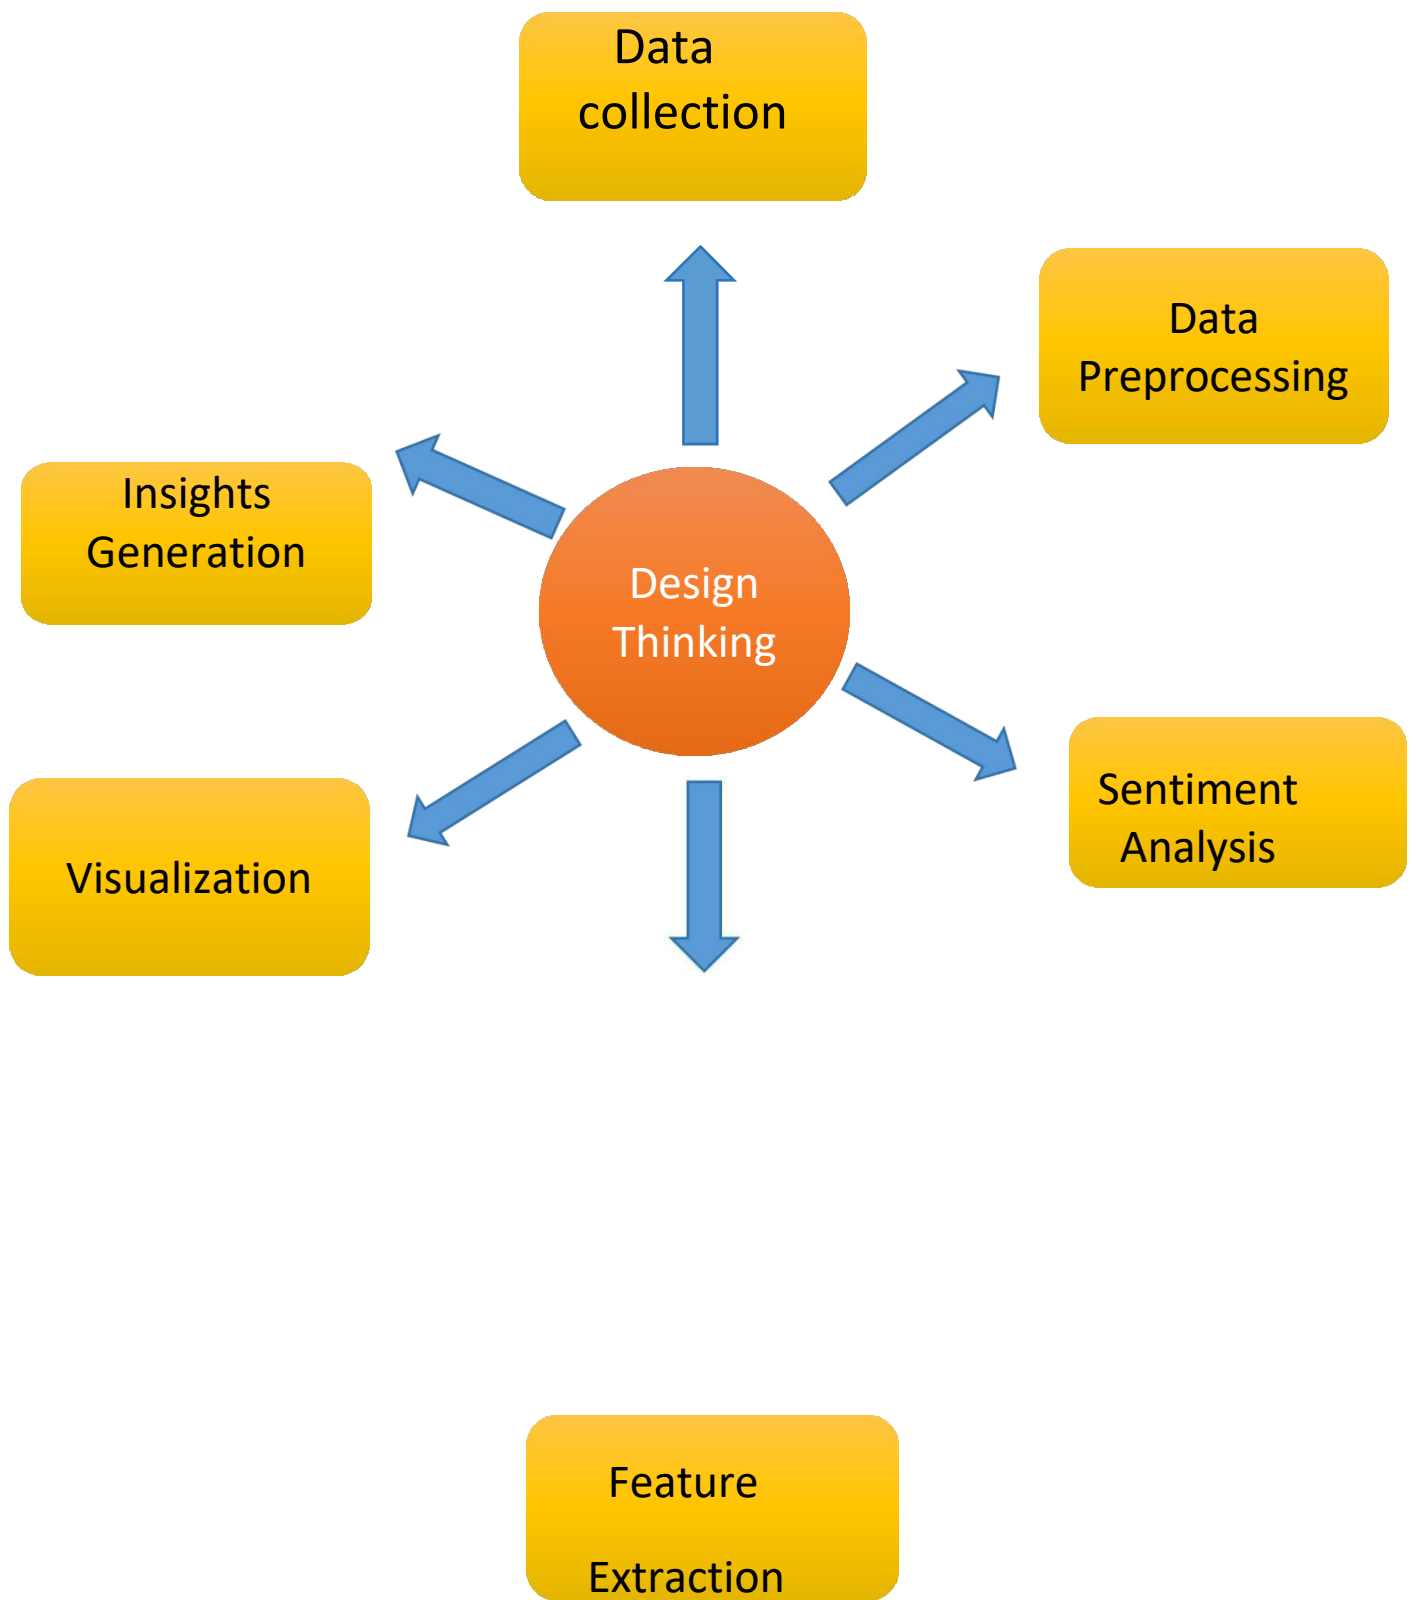

# PROBLEM DEFINITION AND DESIGN THINKING

## PROBLEM DEFINITION

Sentiment analysis, also referred to as opinion mining, is an approach to natural language processing (NLP) that identifies the emotional tone behind a body of text. This is a popular way for organizations to determine and categorize opinions about a product, service or idea.

# DESIGN THINKING

# Data collection

Identify a dataset containing customer reviews and sentiments about competitor products.

# Data Preprocess

Clean and preprocess the textual data for analysis.

Clean

Analysis

Preprocess

# Sentiment Analysis Techniques

Employ different NLP techniques like Bag of Words, Word Embeddings, or Transformer models for sentiment analysis.

Bag of words

# Feature Extraction

Extract features and sentiments from the text data

# Visualization

Create visualizations to depict the sentiment distribution and analyze trends.

Visual Insights

□

# Insights Generation

Extract meaningful insights from the sentiment analysis results to guide business decisions.
